

Catalog #: 2FT-F

2 Foot LED Tube - Frost

UL Number: OOLV2.E361067
 See page 2 for UL Certification

Product Description:

LED's (light emitting diodes) are the future lighting solution. LED tube lights lead to huge energy savings (more than 50% direct energy savings). Sav-lite™ 2 Foot Frost LED Tube Lights can be used in (but are not limited to) offices, supermarkets, factories, hotels, restaurants, garages and basements. These LED tube lights replace CFL and traditional bulbs.

Benefits:

- Long life(~ 50,000 Hours)
- Substantial Cost Saving from Day 1 for new Savlite™ fixtures and new projects (More than 50% direct energy savings, little to no maintenance costs as compared to CFL and minimized heat generation leads to reduction in air-conditioning bills.)
- Huge cost savings for retrofit projects.*
- No RF interference
- Easy Installation: Direct Retrofit into most fluorescent fixtures using existing sockets (with line voltage bypassing ballast/transformer/starter directly to fluorescent sockets).**
- No Retrofit needed when used with Sav-lite™ fixtures
- May qualify for various government credits

Features:

- Eco-Friendly - No mercury, Reduced CO2 Emissions, Recyclable (please check with local recycling rules)
- More Ergonomic- No flickering and no buzzing
- Efficient light distribution
- Available in cool white color temperature
- Unlike CFL, frequent on/off cycle does not affect the life of LED
- LED turns on instantly

* For retrofit, ROI (Return on Investment) is less than two years for typical installations and for the remaining life of LED, enjoy substantial cost savings (energy saving, maintenance cost savings, air conditioning bill savings, etc.)

** Use of the ETL/UL-listed T8 LED lamps in conjunction with bypassing the ballast does not

Technical Specification:

Catalog Number:	2FT-F
Length:	2 Foot
Watts	~ 9 - 11 W
Input Voltage	100 -120 V
Color Temperature:	~ 4000 K
Ambient Temperature:	~ 83 F
Lumens:	~ 900 lm
